

Technical Advisory Board Minutes 3/3/2011

Meeting: PESC Technical Advisory Board Meeting

Time: Thursday, March 3, 3 PM EST

Call-in Number: 1-866-352-3799 code: *7696363*

Attendees

Russ Buyse
Tuan Ahn Do
Jam Hamidi
Sue Lou
Steve Margenau
Michael Morris

Agenda

Topic	Lead	Approx. Time
Minutes Review	Michael	5 min
Language Subcommittee Report	Steve/Jam	10 min
PESC WSDL Requirements	All	40 min
Update R&R	Michael	5 min
Action Item summary	Michael	0 min

Minutes: Morris

Discussion

Language Subcommittee

The committee reported that they had identified the appropriate RFCs and had started on an example schema and instance document

PESC WSDL Requirements

Jam explained how we could gain flexibility by specifying the parameter used to load or return a PESC document as an xs:string since it would allow any standard to be used.

We discussed how we might handle authentication and authorization and possible mechanisms for handling this. One approach is to add logon parameters in the WSDL or having different services and use web service security with different access controls.

We also discussed using the Batch Transcript encapsulation as the basic mechanism of transmission.

Decisions:

The team consensus was that we should pursue defining a WSDL by starting from the BCC WSDL and making modifications.
