Steve Margenau
Michael Morris
David Webber

Agenda

Topic	Lead	Approx. Time
Minutes Review	Morris	1 min
Status of XML R&R	Lou	5 min
Alignment Strategy Meetings	Morris	10 min
Discussion with David Webber on NIEM	Webber	35 min
Action item Summary	Morris	0 min

Minutes: Morris

Discussion

Michael Morris indicated that the TAB meetings on Dec 1, 8, and 15 would be used to discuss alignment of PESC standards with SIF, CEDS, NIEM, and the XML R&R. Michael Sessa will invite some board members and other experts to help in our discussion. The result of this discussion would be a clearer direction of PESC alignment strategy. This would direct TABs efforts in revision the Guidelines on XML Architecture and Data Modeling.

David Webber walked the team through the various schemas and their use in NIEM. He also discussed the problems with metadata being part of the schema. Finally, he discussed how CAM could be used to obviate some of the failings of the current NIEM standards.

Action Items

Sue will set up a call with Wei Wu and Michael Morris to discuss changes to the XML registry and repository.
