

Minutes

Meeting: PESC Technical Advisory Board Meeting

Time: Thursday, August 4, 3 PM ET

Call-in Number: 1-866-352-3799 code: *7696363*

Attendees

Steve Margenau

Sue Lou

Michael Morris

Discussion

- We reviewed the edu1world recommendation and had a few changes that we thought would be appropriate. Generally, we thought the document just needed a little clean up and it is ready to go.
- Michael proposed that we revised the XML Architecture and Data Modeling to include the language attribute and make other revisions that would update the document.
- Michael proposed that if we commit to the R&R that we add the R&R data types to the PESC core-main and use them for all simple content types.
- Michael proposed that when the R&R is stable that we start loading the latest versions of core-main and sector libraries into the component library instead of loading by application. The applications would only be added when they were at the latest version of these libraries.

Action Items:

- Gideon will revise the edu1world recommendation to indicate that standards will be moved to the PESC web site instead of the main edu1world site when they are ready for approval.
