Meeting: PESC Technical Advisory Board Meeting

Time: Thursday, January 27, 2011 3 PM EST

Call-in Number: 1-866-352-3799 code: \*7696363\*

## Attendees:

Steve Margenau

Sue Lou

Michael Morris

## Agenda

Topic	Lead	Approx. Time
Minutes Review	Michael	5 min
HR-XML use of language attribute next steps	Steve	5 min
Data Transport Standard vs. SIF vs. BCC*	Michael	0 min
Edu1world experience	All	0 min
Action Item summary	Michael	0 min
XML R&R		50 min

Minutes: Morris

## Summary

We took the opportunity to discuss issues with the registry and repository. It is clear that the current process of loading elements individually may not work well. We need to determine another solution to get the R&R up to date.

PESC CCB activities have not involved classifying elements in the category hierarchy of the R&R. We need to add this to the CCB process before elements are loaded into the R&R.

## Action items

1. Steve will work with Jam to arrange a meeting with the W3C experts on national language and XML. This meeting may be separate from normal TAB meetings
2. Michael will investigate how we might approach batch loading of the R&R. One possibility is to load from the current versions of the core and sector schemas
3. Sue will determine all the fields that are used to determine if a element is unique and displayed separately in the schema creation function even when it has the same name as another element.
4. Sue will determine if the classification scheme can be enhanced.
