Discussion
- Some of the data structure changes on the R&R in October last year seem to be inconsistent with other features such as batch load. FSA needs to understand how PESC structures its elements and if we have a classification scheme. The addition of Sector Libraries does not appear to be used consistently with PESC usage.
- Gideon went through edu1world administration and set up. We still can't have members delete their own documents without being able to delete other documents. We will continue to look at ways of making files deletion safer.

Actions
- Michael will reply to the email from the FSA programmer for the R&R and inform her about sector libraries and classifications
- Gideon will update edu1world recommendation for review in two weeks
- Michael will lead next Thursday's meeting
