Minutes

Meeting: PESC Technical Advisory Board Meeting

Time: Thursday, August 11, 3 PM ET

Attendees
Tuan Ahn Do
Joseph Giroux
Jam Hamidi
Robert Hewitt
Sue Lou
Steve Margenau
Michael Morris

Discussion

- Joe Giroux described the plan for using web service architecture to transfer transcripts between California Community Colleges. He expressed his interest is starting a PESC workgroup that would use an open source project to develop a subsystem that could be used by anyone for transcript transport and processing.
- Jam presented how BCCampus had actually created such an architecture and had implemented it with the BC Universities. He also discussed the value of Mule Enterprise Service Bus (ESB) software as one way of orchestrating the web services.
- Jam described the open source project that he created has code to marshal and unmarshal Java classes to and from XML.
- Jam discussed how the DTS was evolving and how security was taken out the standard, but will be included in the Implementation Guide to show examples of various security options.
- Sue reported that FSA had not authorized their internal resource to work on the Registry and Repository as yet.

Action Items:

- None
